We are founded on the Vision to build technology to enable seamless financial and payment transactions and provide a comprehensive digital platform to Banks and Merchant segments.

Role: Database Administrator (DBA)

Experience: 3 Years Experience

Work Location: Wagle Estate, Thane

Job Summary:

We are seeking a skilled and proactive Database Administrator (DBA) with 3 years of hands-on experience in managing, maintaining, and optimizing databases. The ideal candidate should have strong expertise in MS SQL Server, Oracle, and MySQL, with additional knowledge of MongoDB and ClickHouse considered a strong advantage.

You will be responsible for ensuring the performance, availability, and security of databases, participating in database design, and supporting development teams in delivering high-quality data solutions.

Job Responsibilities:

- 1) Install, configure, and maintain relational database systems including MS SQL Server, Oracle, and MySQL.
- 2) Monitor and optimize database performance and storage.
- 3) Perform regular database maintenance tasks: backups, restores, patches, and updates.
- 4) Implement and maintain database security policies and procedures.
- 5) Collaborate with developers to design and optimize database schemas, queries, and procedures.
- 6) Troubleshoot database issues and ensure high availability and data integrity.
- 7) Create and maintain documentation on DB configuration, policies, and procedures.
- 8) Plan and implement database migrations and upgrades.
- 9) Set up monitoring and alerting systems for database performance and uptime.
- 10) Participate in on-call rotation or provide support during system outages or incidents

Required Skills & Qualification:

- 1) 3+ years of hands-on experience as a DBA working with:
 - a. MS SQL Server
 - b. Oracle
 - c. MySQL
- 2) Strong knowledge of:
 - a. Database design and modeling
 - b. Performance tuning and optimization
 - c. Backup and recovery strategies
 - d. Security and access control
- 3) Experience with SQL scripting and stored procedures.
- 4) Working knowledge of MongoDB (NoSQL database).
- 5) Exposure to ClickHouse (columnar OLAP database).
- 6) Familiarity with database automation and scripting tools (PowerShell, Bash, etc.).
- 7) Experience with cloud-based database services (e.g., AWS RDS, Azure SQL).
- 8) Understanding of DevOps practices and CI/CD pipelines for database deployment.
- 9) Experience with data replication, sharding, or high-availability setups.
- 10) Strong analytical and problem-solving skills.
- 11) Excellent communication and documentation skills.
- 12) Ability to work independently and as part of a team.
- 13) Proactive attitude with a willingness to learn and adapt to new technologies
- 14) Bachelor's degree in Computer Science, Information Technology, or a related field.
