

□ Jr. iOS Native Developer (Swift)

Position Type: Full- Time | **Experience:** 0–1 Year | **Location:** Thane | **Job Type:** Work From Office

□ About Us

Jode Technologies Private Limited is a leading fintech company specializing in digital solutions for cooperative banks, pathpedhis, housing societies, temples, and parking services. We enable seamless digital payments and mobile-first solutions, impacting a range of industries and making a difference every day.

□ Responsibilities

- Build and maintain iOS applications using Swift and Xcode.
- Integrate REST APIs and work with mobile databases (CoreData, SQLite).
- Implement background services, notifications, and app lifecycle events.
- Integrate Firebase Services (Push Notifications, Firestore, Authentication).
- Maintain clean, readable, and optimized code.
- Debug and test mobile applications for quality and performance.
- Stay updated with best practices and new iOS technologies.
- Assist in integrating analytics, crash reporting services, SDKs, frameworks or static libraries, and plugin creation.

✓ Requirements

- Strong knowledge of Swift and iOS app lifecycle.
- Created 1–2 iOS apps (academic, personal, or App Store published).
- Understanding of REST APIs, JSON parsing, and mobile databases (CoreData, SQLite).
- Familiarity with Firebase Services (Push Notifications, Firestore, Authentication).
- Willingness to learn quickly and adapt.
- Strong analytical and debugging abilities.
- Awareness of version control (Git).
- Familiarity with Flutter and mobile app security best practices.
- Understanding of SDKs, frameworks, static libraries, plugin creation, and integration.

□ What We Offer

- Opportunity to work in the growing fintech sector and build mobile solutions impacting a range of industries.
- Learn from experienced mobile developers and gain hands- on experience.
- Friendly and collaborative working environment.
- Opportunities for rapid learning, growth, and career advancement.
