

Spring Boot Developer (3-5 Years Experience)

Experience: 3-5 years

Education: Bachelor's/Master's in Computer Science, IT, or a related field

Job Summary:

We are looking for a Spring Boot Developer with 3-5 years of experience to join our dynamic team. The ideal candidate should have strong experience in backend development using Spring Boot, Java, Microservices, and RESTful APIs. They should be proficient in designing scalable applications, integrating with databases, and following best coding practices.

Key Responsibilities:

Design, develop, and maintain backend services using Spring Boot and Java.

Develop and integrate RESTful APIs and Microservices.

Work with relational and NoSQL databases like MySQL, PostgreSQL, MongoDB, etc.

Implement Spring Security, JWT, and OAuth2 for authentication and authorization.

Optimize applications for performance, scalability, and security.

Write clean, maintainable, and testable code following best practices.

Collaborate with front-end developers, QA engineers, and DevOps teams.

Debug, troubleshoot, and resolve technical issues.

Required Skills & Experience:

3-5 years of experience in Java and Spring Boot development.

Strong understanding of Microservices architecture and RESTful API development.

Experience with databases like MySQL, PostgreSQL, or MongoDB.

Familiarity with Spring Security, OAuth2, and JWT.

Strong knowledge of ORM frameworks like Hibernate/JPA.

Proficiency in Unit Testing (JUnit, Mockito, TestNG).

Experience with Kafka, RabbitMQ, or other messaging systems (optional but preferred).

Familiarity with Agile methodologies (Scrum/Kanban).

Strong problem-solving and debugging skills.

Nice-to-Have Skills:

Work with Docker and Kubernetes for containerization and deployment.

Utilize CI/CD pipelines for automated deployment using Jenkins, GitHub Actions, or GitLab CI/CD.
