Job Title: UI/UX Designer

Location: Wagle Estate, Thane

Employment Type: Full-Time

Experience: 0–1 year

Job Summary:

We are looking for a passionate and detail-driven UI/UX Designer who can craft stunning user experiences and bring interfaces to life with motion using Rive or LottieFiles. You'll play a crucial role in designing intuitive interfaces for web and mobile applications, and enhance user engagement through smart, scalable micro-interactions and animations.

Key Responsibilities:

🎨 *UI/UX Design*

- Create wireframes, prototypes, and high-fidelity visual designs for web and mobile applications.
- Translate product and user requirements into intuitive interfaces.
- Conduct UX research and gather feedback to refine flows and components.
- Collaborate closely with product managers, developers, and stakeholders.

🔁 *Micro-Animations & Interactions*

- Design and implement smooth micro-interactions and animations using Rive or LottieFiles.
- Create animated assets like loading icons, onboarding sequences, button effects, and illustrations.
- Optimize animations for performance and seamless integration with development platforms (React, Flutter, Web, etc.).
- Collaborate with frontend engineers to ensure accurate implementation of animated elements.

Requirements:

- 0–1 years of UI/UX design experience with a strong portfolio.
- Proficiency in Figma, Adobe XD, Sketch, or similar design tools.
- Strong understanding of UX principles, mobile-first design, and design systems.
- Solid grasp of typography, color theory, layout, and spacing.
- Ability to communicate design ideas and decisions clearly.

Nice-to-Have:

- Experience with Rive or LottieFiles for interactive motion design.
- Experience with After Effects and Bodymovin (for custom Lottie animations).
- Basic knowledge of HTML, CSS, or Flutter.
- Familiarity with Git or developer collaboration tools.
- Experience designing for fintech or consumer apps.

Benefits:

- Creative freedom & ownership
- Work with a modern tech stack and fast-paced product teams
- Opportunity to shape engaging user journeys from pixels to motion
